## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is usually required under 35 U.S.C. §121:

- I. Claims 1-11, drawn to a system, classified in class 705, subclass 21.
- II. Claims 12-19, drawn to a method, classified in class 705, subclass 16.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. See MPEP §806.05(e). In this case, the apparatus as claimed can be used to practice another and materially different process—one that already has determined the point value system.

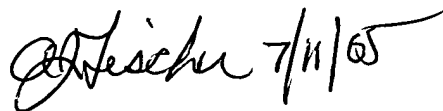

3. Because these inventions are distinct for the reasons given above, because these inventions have acquired a separate status in the art as shown by their different classification and divergent subject matter, and because the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Andrew B. Morton on or about July 1, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
